

Advertiser Kit

Q4 2019

MEDIA KIT
Q4 2019 (OCTOBER – DECEMBER)

WHAT WE DO

CodeFund is an ethical advertising platform that focuses on funding open source maintainers, bloggers, and builders through non-tracking ethical ads. *If you goal is to introduce new tools, services and technologies to a growing audience of developers, we can help.*

We believe that by providing an effective marketing channel for companies to share their products and services, developers can capitalize on ad revenue *without needing to have their visitors tracked and profiled.*

We have over 170 publisher websites generating more than 20 million ad impressions each month and we are growing at a rapid pace. Our primary audiences are JavaScript and Blockchain developers, although we have a websites that cover most programming fields.

Our platform follows the "ethical advertising" guidelines that ReadTheDocs established. We will not track or profile the ad viewers, and we only show ads that are relevant to the audience. This document describes how we can help you reach a broader audience. We look forward to working with you!

MEET THE TEAM

Founded in 2017, CodeFund began by providing a simple way for software developers to generate passive, recurring revenue for their open source projects.

We are a remote-first company that values quality of contributions over time in office. Each member of our team provides a unique set of skills that enables us to stay small and agile.

We are always happy to talk. You can view our contact details on our website.

Eric Berry

Eric Berry is the founder and CEO of CodeFund. He is also a developer and marketer.

Nathan Hopkins

Nathan Hopkins is a cofounder and Director of Engineering. He rejoined CodeFund in 2018.

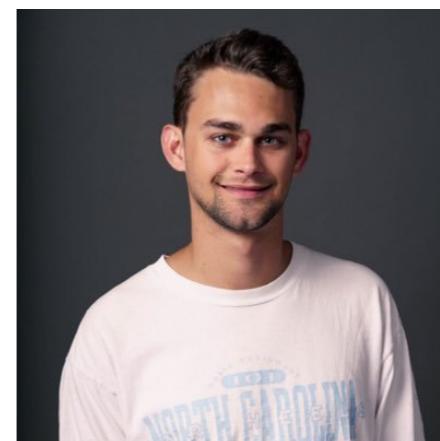

Justin Dorfman

Developer Relations

Joseph Chen

Operations Lead

Andrew Mason

Software Engineer

Kevin Owocki

Cofounder and CEO of Gitcoin (parent company)

RECENT ADVERTISERS

Our advertisers comes from many areas of the technology industry including SaaS, infrastructure, database, recruitment, blockchain and educational services.

Here is just a selection of companies who we've worked with:

TESTIMONIALS

CodeFund has quickly become one of our highest converting channels. If you want to reach a technical audiences look no further than CodeFund!

Chipper Nicodemus
Sr. Mgr of Acquisition, Segment

If you're looking to find developers, there's no better ad channel than CodeFund. You can easily find millions of developers at significantly less cost than Stack Overflow or other competing developer-exclusive advertising platforms.

Dean Ramadan
Growth Marketing, ConsenSys

AUDIENCES

JavaScript & Frontend

Frontend development including React, Vue, Angular, and more!

Server-Side Web Development

Includes Python, Ruby, PHP, Django, Ruby on Rails, Phoenix, Laravel, and more!

Mobile Development

Mobile app developers using Android, Objective-C, Swift, and React Native

CSS & Design

Tools, blogs, and CDN's that provide UI/UX, design, and CSS frameworks.

Blockchain

Blockchain developers, dApp builders, and cryptocurrency users and investors

Game Development

Game tutorials, toolkits, and blogs for both mobile and web game development

DevOps

Includes Kubernetes, Serverless, architecture design and tools

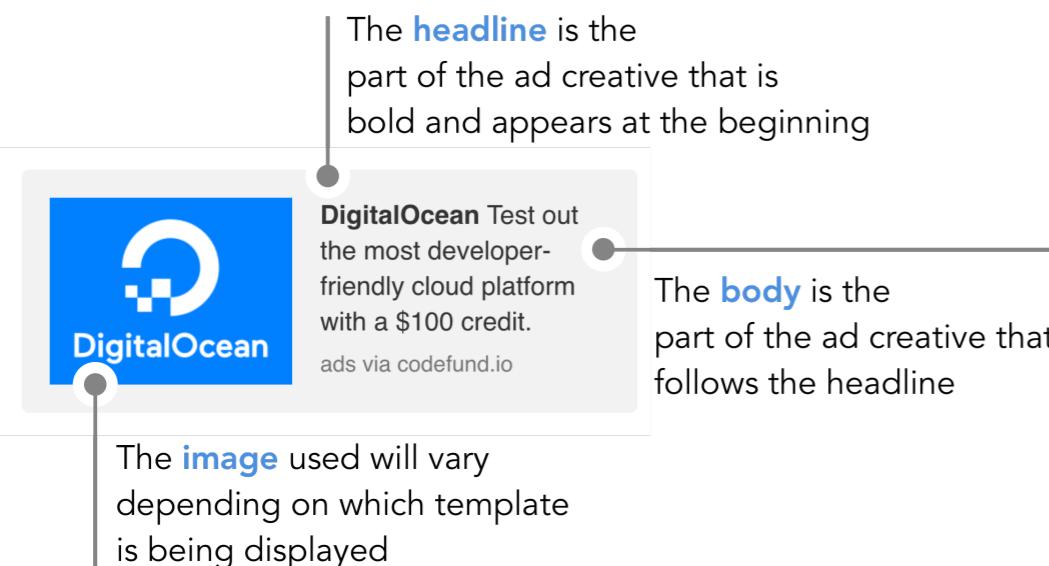

Miscellaneous

Popular projects and sites that attract developers, but do not fit other audiences

CREATIVES

CodeFund does not use image-based banner ads. Instead, we use a common ad components that fit our 10+ templates.

Each creative is comprised of 4 parts: headline, body, call to action, and image.

Headline

The headline is the bold portion of the ad copy and appears before the body.

Body

The body is the portion of the ad copy that follows the headline.

Call To Action

The short instructional message that follows the body. This does not appear in all templates.

Image

The image used will vary depending on which template is being displayed. Image sizes include:

Icon (20x20) - The icon image is a 20x20 pixel transparent PNG. This image is used on websites such as [etherscan.io](#) and others that use text-based ad templates.

Small (200x200) - The small image is a 200x200 pixel PNG or JPG. This image is typically displayed in a smaller format (as small as 50x50) and is not recommended to include text.

Large (260x200) - The large image is a 260x200 pixel PNG or JPG. This image is our most commonly used image size (see [bootstrapcdn.com](#)).

Wide (512x320) - The wide image is a 512x30 pixel JPG (not PNG). The image should have at least 32px padding on each edge. This image size is currently only used with the [Daily Chrome extension](#).

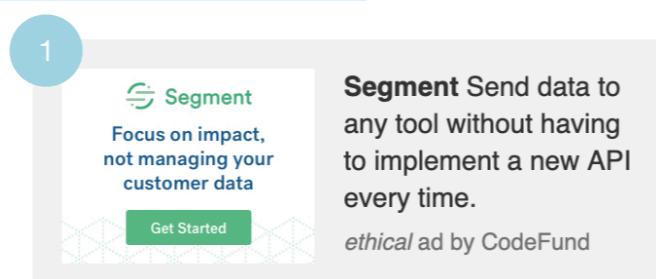

CREATIVE TEMPLATE EXAMPLES

Our publishers can choose which templates they use on their website. Here's what they look like.

PRICING BY AUDIENCE

We charge based on an effective cost per mille (eCPM). Our rates vary based on the location of the visitor, the targeted audience of the campaign, and the quarterly demand.

Audience	United States	Canada	Europe	Australia	New Zealand	Other
JavaScript		\$ 6.25		\$ 5.25		\$ 2.25
Server-Side Web Development		\$ 5.00		\$ 4.00		\$ 1.00
Mobile Development		\$ 4.50		\$ 3.50		\$ 0.50
UX/UI & Design		\$ 4.50		\$ 3.50		\$ 0.50
Game Development		\$ 4.25		\$ 3.25		\$ 0.25
DevOps		\$ 6.50		\$ 5.50		\$ 2.50
Blockchain		\$ 10.00		\$ 9.00		\$ 6.00
Miscellaneous		\$ 4.25		\$ 3.25		\$ 0.25

PRICING BY PROPERTY

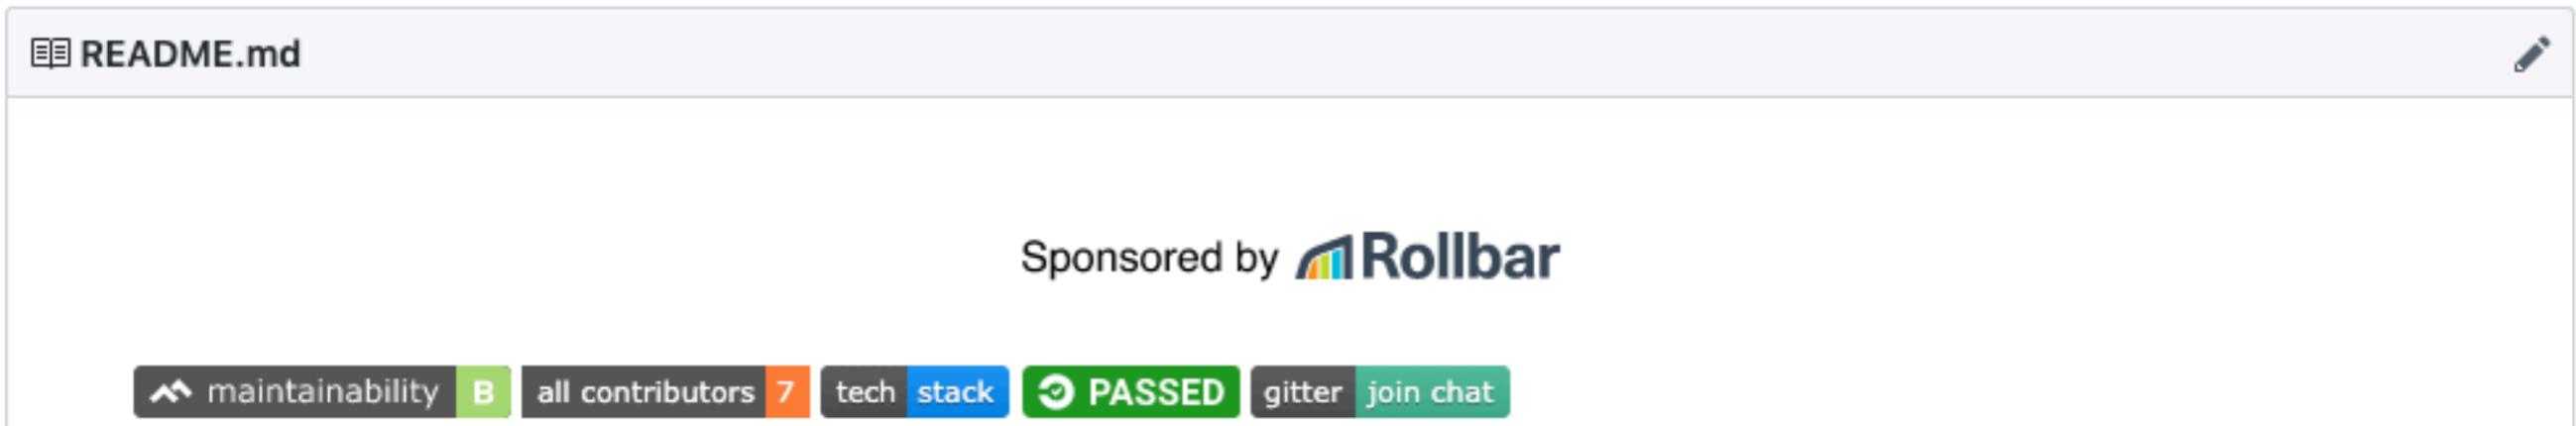

Many of our publishers have specific pricing due to the high demand and unique value proposition they provide.

OPEN SOURCE SPONSORED ADS

In October, we launched sponsored ads that appear on many high-traffic GitHub open source projects. With sponsored ads, we place a simple “Sponsored by YOU” at the very top of the GitHub README file.

An updated version of the advertiser kit will be released with more details. If you would like to know more information, contact Eric Berry (see last page).

The screenshot shows a GitHub repository's README.md file. At the top, there is a header with a pencil icon for editing. Below it, the text "Sponsored by  Rollbar". Underneath, there is a row of GitHub status badges: "maintainability B", "all contributors 7", "tech stack", "CI PASSED", "gitter", and "join chat".

CodeFund Ads

CodeFund Ads is an ethical and discreet ad platform that funds open-source. It helps your favorite projects thrive by paying maintainers the majority of all generated revenue.

REPORTING & VISIBILITY

Our advertisers receive extensive support and data that will help them make the best buying decisions in advertising.

Reports will be sent each month containing a customized breakdown of each campaign in PDF form.

You will be able to analyze your traffic pivoted by country, creative, campaign, and even publisher website!
